

— HUMAN-SUPERVISED WORKFLOWS FOR CLAIMS OPERATIONS

Don't hire another employee just to do first-pass claims review.

If your team is spending time checking packets for missing documents, missing fields, and basic completeness **before a trained reviewer can even begin**, that's work a supervised workflow can handle first.

Your most trained reviewers aren't paid to play "what's in this folder." They're paid for the judgment that comes after.

 **Fewer cold opens**
Reviewers start with clean files

 **Faster routing**
Completeness checked pre-queue

 **Cleaner handoffs**
Structured summary to next step

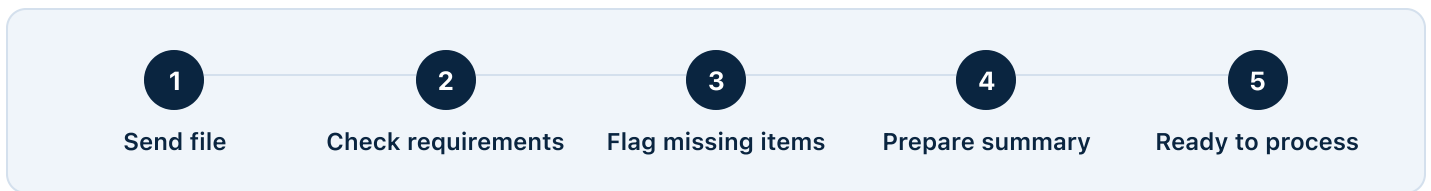

We prepare the file, review all documents, apply your rules, and deliver it ready to process.

PILOT	30 days, fixed fee
BUILT FOR	High-volume intake teams
FROM	\$4,500

01 What we replace

 First-pass file review	 Completeness checks
 Missing-doc detection	 Structured packet prep

02 How it works

03 Best-fit buyer & why human-supervised

1,000+ packets / month	Mid-market intake operations	WC first workers' comp wedge	<p>—</p> <p>WHY HUMAN-SUPERVISED</p> <p>We remove repetitive labor. We do not remove judgment.</p>
-------------------------------------	---	---	---

04 Pilot terms

DURATION 30 days	SCOPE One workflow	DOCUMENT FAMILY One per pilot	PRICE From \$4,500
----------------------------	------------------------------	---	------------------------------

Before hiring another claims assistant, let's see if this layer should exist at all.
